TEAM TASK TRACKER — STEP-BY-STEP RUNNING GUIDE

Complete command reference to clone, set up, and run both Backend and Frontend on any machine.

PREREQUISITES

- **Python:** Version 3.10 or higher installed
- **Node.js:** Version 18.x or higher installed (with npm)
- **MongoDB:** Local MongoDB Service running (Port 27017) or MongoDB Atlas URI

STEP 1: CLONE OR OPEN THE PROJECT

Open terminal / Command Prompt and run:

```
git clone https://github.com/SAfsehEhsani/Team-Task-Tracker-Jira.git
cd Team-Task-Tracker-Jira
```

STEP 2: OPTION A — 1-CLICK AUTOMATIC RUN (RECOMMENDED FOR WINDOWS)

In the root project folder, double-click **start.bat** or run in Command Prompt:

```
.\start.bat
```

This single command automatically performs everything:

- Verifies MongoDB service is active.
- Creates Python **backend_venv** and installs all dependencies from **backend\requirements.txt**.
- Installs frontend packages via **npm install** in the **frontend** folder.
- Starts Backend server on **http://127.0.0.1:8000** and Frontend on **http://localhost:3000**.
- Automatically launches your default web browser to the dashboard.

STEP 3: OPTION B — MANUAL RUN (TERMINAL-BY-TERMINAL)

If running manually using separate Command Prompt windows:

1. Start Local MongoDB Service:

```
net start MongoDB
```

2. Terminal 1 — Backend (Django REST Framework):

Run in the root project folder:

```
python -m venv backend_venv
backend_venv\Scripts\activate
pip install -r backend\requirements.txt
python backend\manage.py runserver 127.0.0.1:8000
```

3. Terminal 2 — Frontend (Next.js):

Open a new Command Prompt window and run:

```
cd frontend
npm install
npm run dev
```

STEP 4: OPTION C — MAC & LINUX USERS

Run the automated shell script:

```
chmod +x start.sh
./start.sh
```

STEP 5: OPEN IN BROWSER

- **Frontend Web UI: http://localhost:3000**
- **Backend API Health Check: http://127.0.0.1:8000/api/health/**

STEP 6: PRE-CONFIGURED LOGIN CREDENTIALS

- **Administrator Account:**

- Email: **admin@teamtracker.local**

- Password: **Admin@12345**

- Permissions: Full admin control, team creation, user management, live MongoDB inspector.

- **Team Member Account:**

- Email: **alice.chen@techcorp.io**

- Password: **Alice@12345**

- Permissions: View assigned tasks, update task status (To-Do, In Progress, In Review, Done).

- **New Account Registration:** Click **'Create an account'** on the login page to register a new Admin or Member account anytime.
